WireWheel Privacy Operations Manager

Get full control over
your privacy program

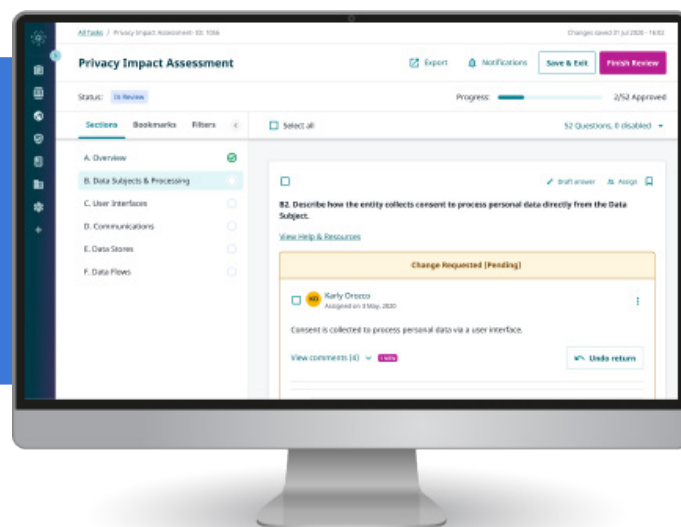

wirewheel.io

Stop managing your privacy program with spreadsheets and emails and get ready to comply with CPRA and other upcoming privacy regulations. Scale your processes, save time, keep watch and ensure compliance.

WireWheel's Privacy Operations Manager gives privacy officers the information they need to demonstrate and ensure compliance and mitigate data privacy risk.

Use WireWheel's Privacy Operations Manager SaaS Platform as the **one source of truth for your privacy data**, helping your team:

 Deploy and manage assessments

 Flag assessments for task remediation and prioritization

 Manage Third Party / Vendor Risk

 Create a record of processing (ROPA)

 Document, report and measure your progress

WireWheel's completely integrated privacy program management platform is supported by WireWheel's privacy experts.

Whether you are just getting started or you have a robust program in place, the WireWheel Privacy Operations Manager can be tailored to the needs of your privacy program, adding **customization, integrations** with your company’s applications and **privacy program intelligence** as your program matures:

Essentials	Pro	Enterprise
<p align="center">Privacy Operations Manager: Privacy Assessment Workflow Automation Tools for companies of all sizes</p>		
<p>For companies looking to quickly implement automated Privacy Assessment workflows includes standard, turnkey template library of assessments and reporting.</p>	<p>More customization, intelligence, integrations and enterprise-level functionality to take your privacy program to the next level. Access to integration support, multi-language capabilities and advanced configurability.</p>	<p>Tailored privacy assessment workflows and packages designed for more mature, complex privacy teams. Customized assessments and risk scoring, integration and automation and custom workflows and conditionality.</p>
<p align="center">Integration and Automation, Professional Services and Privacy Advisory:</p> <p>Automate privacy processes and integrate with organization’s systems with help, if you need it, from the WireWheel’s Professional Service and Privacy Advisory team.</p>		

Want to integrate privacy into your company’s applications? WireWheel offers several options for integration and automation. With these options, you may be able to automatically:

- **Kick off a vendor assessment** when a new vendor is added to a procurement system or a new SaaS platform is added to the network
- **Kick off a PIA** when a new product is added to your program management system
- **Kick off a DPIA** as part of your ongoing business in the EU

WireWheel integration options include:

APIs:

Leverage APIs to build the interface between your company’s applications and WireWheel to enable full automation of your privacy challenges

Functions as a Service:

Speed up the implementation of activities that are common to privacy use cases with discrete, pre-coded and hosted solutions that can be flexibly combined.

Low Code Solutions and Apps:

Connectors, adapters and apps that enable low code integration with your company’s applications.

The WireWheel Privacy Operations Manager is tailored to the needs of your privacy program, adding customization, integrations and business insights as your program matures:
